Industry structure and development

Food processing industry in India is a sunrise sector that has gained prominence in the recent years. Availability of raw materials, changing lifestyles and appropriate fiscal policies has given a considerable push to the industry's growth. This sector serves as a vital link between the agriculture and industrial segments of the economy. Strengthening this link is of critical importance to improve the value of agricultural produce; ensure remunerative prices to farmers and at the same time create favorable demand for Indian agricultural products in the world market. A thrust to the food processing sector implies significant development of the agriculture sector and ensures value addition to it.

The Indian food processing industry holds tremendous potential to grow, considering the still nascent levels of processing at present. Though India's agricultural production base is reasonably strong, wastage of agricultural produce is sizeable. Processing of fruits and vegetables is a low 2%, around 35% in milk, 21% in meat and 6% in poultry products. By international comparison, these levels are significantly low - processing of agriculture produce is around 40% in China, 30% in Thailand, 70% in Brazil, 78% in the Philippines and 80% in Malaysia. Value addition to agriculture produce in India is just 20%, wastage is estimated to be valued at around US\$ 13 bn (₹ 580 lacs).

Your Company is more than three decades old in the food processing sector manufacturing vermicelli, macaroni and other pasta products at its manufacturing units located in Bibinagar, Andhra Pradesh, Gurgaon, Haryana and at Indore, Madhya Pradesh. Over the years, Bambino has emerged as a Market Leader in the pasta industry. The Installed capacity of the Company as on date stands at 1,30,460 MTS p.a. and products are sold under the Brand name "Bambino" acquiring enviable reputation in domestic and overseas markets. The Company has a wide distribution network for selling the products.

Opportunities and threats

The food market itself has seen some interesting structural changes in the past few years with the emergence of a diversified palate of choices across functional and indulgent products. Additionally, with greater affluence and exposure, consumers are increasingly migrating from unbranded commodities, to branded and packaged solutions that are hygienic and convenient. Leveraging the Company's brand image, the company has biggest opportunity in increasing in depth and width of the market by offering varied health and nutritional products supported by aggressive marketing initiatives.

However, there being no entry barrier in the food processing sector, new players can foray into this segment thereby intensifying the competition leading to price wars and thereby affecting the realizations. The food

processing industry, apart from its cyclical nature, is also subject to the vagaries of monsoon as it is dependent on the agro based raw material namely "wheat". Any change in the availability and price of this raw material can have a direct impact on the profitability of the company. There is also threat of spurious / counterfeit products flooding the market, which can have negative impact on sales volumes of the genuine and reputed players in the market

Future Outlook

As a pioneer in the vermicelli & pasta industry, Bambino is looking at future to reposition itself as a food-healthcare organization. With this objective, the company has strengthened its R & D by identifying lifestyle diseases and developing traditional food of India, which also has health benefits. In order to establish that the product has got proper certification, it is being tested in reputed institutions & hospitals by clinical trials, to ensure what we claim will be in the final product.

This will definitely enhance the value of the brand to enter a unique area of lifestyle diseases and giving them suitable solutions, without having side effects. This will also broaden the company's spectrum of distribution to new channels like chemists, hospitals and other wellness stores. It will be a great service to the society and creating a strong foundation for future. This will not only help the company to grow further but also bestow good profits. This will transform Bambino into a trans-national company with functional foods.

Your company's key thrusts for the current year would be to deliver profitable growth through introduction of premium pasta products, functional foods in the health and wellness platform, effective cost reduction management, aggressively scale up the FMCG initiatives including brand building and maintain leadership position. The company also seeks to enhance supply chain and sales distribution capabilities. Strong management and technical capabilities, good financial flexibility, experience of the group of about 3 decades in manufacturing and marketing the pasta products all these initiatives are expected to provide sustainable growth by establishing the company as the leading FMCG player in the pasta segment.

Risks & concerns

The major risks faced by our company is intense competition from both organized and unorganized sector, rising prices of raw materials and power deficit particularly in Telangana and price wars resorted by competitors, infringement of the brand from unscrupulous manufacturers which may affect the profitability.

Internal Control Systems and their adequacy

The Company has an adequate internal control system commensurate with the size and complexity of the organization. The Company has undertaken a comprehensive review of all internal control systems to take care of the needs of the expanding size of the Company and also upgraded the IT support systems. A system of internal audit to meet the statutory requirement as well as to ensure proper implementation of management and accounting controls is in place. The Audit Committee periodically reviews the adequacy of the internal audit functions.

Statement in this "Management Discussion & Analysis " may be considered to be "forward looking statements" within the meaning of applicable security laws or regulations. Actual results differ materially from those expressed or implied. Important factors that could make a difference to the company's operations include Indian demand supply conditions, raw material availability and prices, agricultural yield, Government regulations besides other factors such as litigations and court cases.
